Introduction

This guidebook describes procedures for updating Bluetooth software. This is necessary in order to update the compatibility with new phones. Be sure to read the warning and procedures carefully before updating.

Requirements

- The update software varies by model. Confirm the software before updating.
- Updating requires a computer with built-in Bluetooth or a Bluetooth dongle.
- Do not update Bluetooth software while driving.
- Do not turn off the vehicle's ACC or Head Unit power while updating. The update will not be performed correctly and the product may become unusable.
- Updating results in all user information being deleted: user settings, paired phones, and phonebook contacts.

Confirmed Computer Configurations

Operating System

- Microsoft Windows XP Professional Service Pack 2
- Microsoft Windows Vista Home Premium
- Microsoft Windows Vista Business
